## vintage hunting tips

- Feel the fabrics, along an entire rack before pulling any garments out. The higher the material quality, the more likely you are on to a great find.
- Things can be taken in, but not often made to fit a bigger sized body... So if it's obviously too small, give it up!
- Recommend vintage shopping outfit: slip on shoes or flats, a simple skirt/pants and a singlet top, layered with a cardigan for warmth.
- Take a sturdy, large bag with you. There's nothing worse than moving on to the next stop with a handful of plastic shopping bags. Buy your clothes, stash and flip your bag over your shoulder. Keep both hands free!
